Material Safety Data Sheet

Section 1. Chemical product and company identification

Commercial name(s).

Nitrogen/ALIGAL ™ 1/ALIGAL WINE

Material uses

Various./Special atmospheres for food.

Supplier/Manufacturer

Air Liquide Canada Inc. 1250, René-Lévesque West, Suite 1700,

Montreal, QC H3B 5E6

In case of emergency

: (514) 878-1667

Section 2. Hazards identification

Physical state

: Gas or liquefied gas.

Emergency overview

: CAUTION!

HIGH PRESSURE GAS. GAS REDUCES OXYGEN AVAILABLE FOR BREATHING. Keep away from heat (<52°C/125°F). Use only with adequate ventilation. Extremely hazardous gas/liquid under pressure. Keep cylinder valve closed when the product is not

used. Gas may accumulate in confined areas.

Routes of entry

: Inhalation. Dermal contact. Eye contact.

Potential acute health effects

Inhalation

; Inhalation of this product may cause dizziness, an irregular heartbeat, narcosis, nausea or asphyxiation.

Skin

: Dermal contact with a rapidly evaporating liquid could result in freezing of the tissues or

frostbite.

Eyes

: Liquid or rapidly evolving gas can cause burns similar to frostbite.

Ingestion

Since the product is a gas, it will probably be inhaled rather than ingested. Consider first the preventive measures in case of inhalation. Ingestion of liquid can cause burns similar

to frostbite.

Potential chronic health

effects

: CARCINOGENIC EFFECTS: Not available. MUTAGENIC EFFECTS: Not available. TERATOGENIC EFFECTS: Not available.

Medical conditions aggravated by over-

exposure

: None known.

See toxicological information (Section 11)

Section 3. Composition, Information on Ingredients

CAS number mole %

Canada

Nitrogen 7727-37-9 100

This material is classified hazardous under the WHMIS Controlled Product Regulation in Canada. See Chapters 8, 11, 14 and 15 for details.

Section 4. First aid measures

Prompt medical attention is mandatory in all cases of overexposure to this gas. Rescue personnel should wear a self-contained breathing apparatus.

Inhalation

: In case of inhalation, conscious persons should be assisted to an uncontaminated area and inhale fresh air. The person should be kept warmed and calm. Quick removal from the contaminated area is most important. Unconscious persons should be moved to an uncontaminated area, given assisted resuscitation and supplemental oxygen. Further treatment should be symptomatic and supportive.

Page: 1/6 : 06/15/2011 Date of issue www.airliquide.ca 1-800-817-7697

Skin contact

Remove contaminated clothing and rinse affected skin with lukewarm water. Do not rinse with hot water. Provide medical prompt attention, frozen tissue is painless and appear waxy, with a possible yellow color. Frozen tissue will become swollen, painful and prone to infection when thawed.

Eye contact

Individual in contact with a gas should not wear contact lenses. Check for and remove any contact lenses. In case of contact, immediately flush eyes with plenty of water for at least 20 minutes. Get medical attention if symptoms occur.

Ingestion

Since the product is a gas, it will probably be inhaled rather than ingested. Consider first the preventive measures in case of inhalation.

Notes to physician

The medical doctor must be warned that the person may suffer from anoxia.

Section 5. Fire-fighting measures

Flammability of the product

: Non-flammable.

Products of combustion

Decomposition products may include the following materials: nitrogen oxides

Explosion hazards in the presence of various substances

: Container explosion may occur under fire conditions or when heated.

Fire-fighting media and instructions

: Use an extinguishing agent suitable for the surrounding fire.

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Contact supplier immediately for specialist advice. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers

Contains gas under pressure. In a fire or if heated, a pressure increase will occur and the container may burst or explode.

Special protective equipment for fire-fighters Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions

EVACUATE ALL PERSONNEL FROM AFFECTED AREA. Use appropriate protective equipment. If leak is in user's equipment, be certain to purge piping with an inert gas prior to attempting repairs. If leak is on cylinder or cylinder' valve, contact the closest Air Liquide location.

Environmental precautions

Ensure emergency procedures to deal with accidental gas releases are in place to avoid contamination of the environment. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods for cleaning up

Immediately contact emergency personnel. Stop leak if without risk. Note: see section 1 for emergency contact information and section 13 for waste disposal.

Section 7. Handling and storage

Handling

Valve protection caps must remain in place unless cylinder is secured with valve outlet piped to usage point. Do not drag, slide or roll cylinders. Use a suitable hand truck for cylinder movement. Use a pressure regulator when connecting cylinder to lower pressure piping or systems. Do not heat cylinder by any means to increase the discharge rate of product from the cylinder. Use a check valve or trap in the discharge line to prevent hazardous back flow to the cylinder. Do not tamper with (valve) safety device. Close valve after each use and when empty.

Page: 2/6 **Date of issue** : 06/15/2011 www.airliquide.ca 1-800-817-7697

Storage

Protect cylinders from physical damage. Store in cool, dry, well-ventilated area of non combustible construction away from heavily trafficked areas and emergency exits. Do not allow the temperature where cylinders are stored to exceed 52°C/125°F. Cylinders must be stored upright and firmly secured to prevent falling or being knocked over. Full and empty cylinders should be segregated. Use a "first in - first out" inventory system to prevent full cylinders being stored for excessive periods of time. Post "No Smoking or Open Flames" signs in the storage or use area. There should be no source of ignition in the storage or use area.

Section 8. Exposure controls/personal protection

Engineering controls

: Use only in well-ventilated areas.

Personal protection

Respiratory : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

: Wear suitable gloves for the application. Hands

: Safety glasses with side shields. **Eyes**

: Wear appropriate personal protective suit. Skin/Body

Metal cap, safety shoes are recommended when handling cylinders.

Not available.

Some applications of this product may require additionnal or other specific protective clothings. Please consult your supervisor.

of a major leak

Personal protection in case : Safety glasses, goggles or face shield. Impervious gloves. Full suit. Metal cap, safety boots. Wear MSHA/NIOSH-approved self-contained breathing apparatus or equivalent and full protective gear.

Occupational exposure limits		TWA (8 hours)			STEL (15 mins)			Ceiling		
Ingredient	List name	ppm	mg/m³	Other	ppm	mg/m³	Other	ppm	mg/m³	Other
nitrogen	US ACGIH	1	-	_	-	-	-	-	-	-

Consult local authorities for acceptable exposure limits.

Section 9. Physical and chemical properties

Physical state : Gas or liquefied gas.

Color : Colorless. **Odor** : Odorless. Molecular weight : 28.02 g/mole

Molecular formula

Boiling/condensation point: -195.79°C (-320.4°F) **Melting/freezing point** : -209.99°C (-346°F) **Critical temperature** : -146.9°C (-232.4°F)

Specific gravity : 0.97

Page: 3/6 **Date of issue** : 06/15/2011 www.airliquide.ca 1-800-817-7697

Section 10. Stability and reactivity

Stability and reactivity

Hazardous decomposition

products

: The product is stable.

Under normal conditions of storage and use, hazardous decomposition products should

not be produced.

Hazardous polymerization : Under normal conditions of storage and use, hazardous polymerization will not occur.

Section 11. Toxicological information

Acute toxicity

Acute Effects

Inhalation

; Inhalation of this product may cause dizziness, an irregular heartbeat, narcosis, nausea

or asphyxiation.

Skin

: Dermal contact with a rapidly evaporating liquid could result in freezing of the tissues or

frostbite.

Eyes

Liquid or rapidly evolving gas can cause burns similar to frostbite.

Ingestion

: Since the product is a gas, it will probably be inhaled rather than ingested. Consider first the preventive measures in case of inhalation. Ingestion of liquid can cause burns similar

to frostbite.

Potential chronic health

effects

CARCINOGENIC EFFECTS: Not available. **MUTAGENIC EFFECTS**: Not available. TERATOGENIC EFFECTS: Not available.

Section 12. Ecological information

Aquatic ecotoxicity

Products of degradation : These gases are released as is in the atmosphere.

Section 13. Disposal considerations

Disposal

: Do not attempt to dispose of the container or of its content. Return in the shipping container properly labeled, with any valve outlet plugs or caps secured and valve protection cap in place to Air Liquide for proper disposal. For emergency disposal, contact the closest Air Liquide location.
